De Novo Definition and Validation of Nematode Nigon Units for chromadorea_odb12

Gonzalez de la Rosa et al. Unsupervised Clustering Methodology Replicated Across 77 Chromosomal Assemblies

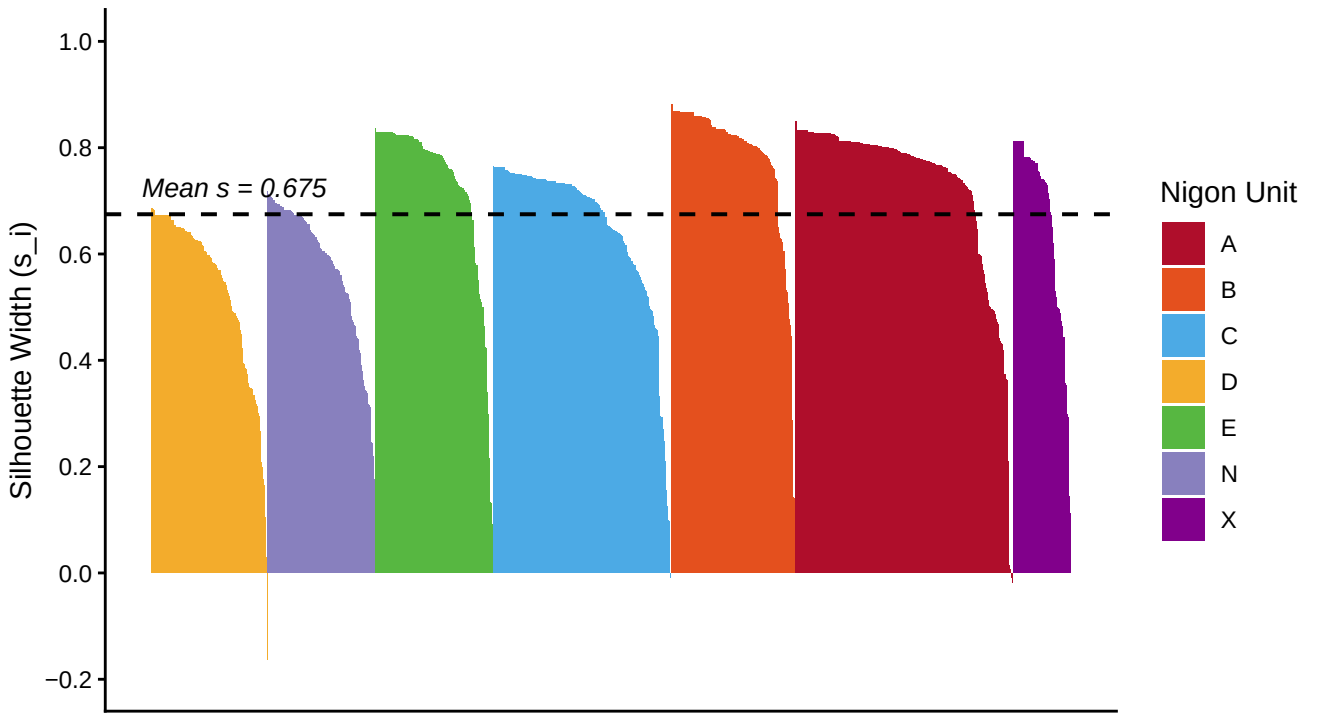

A. Cluster Validation (k = 2 to 10)

Global maximum average silhouette width at k = 7 (s = 0.675)

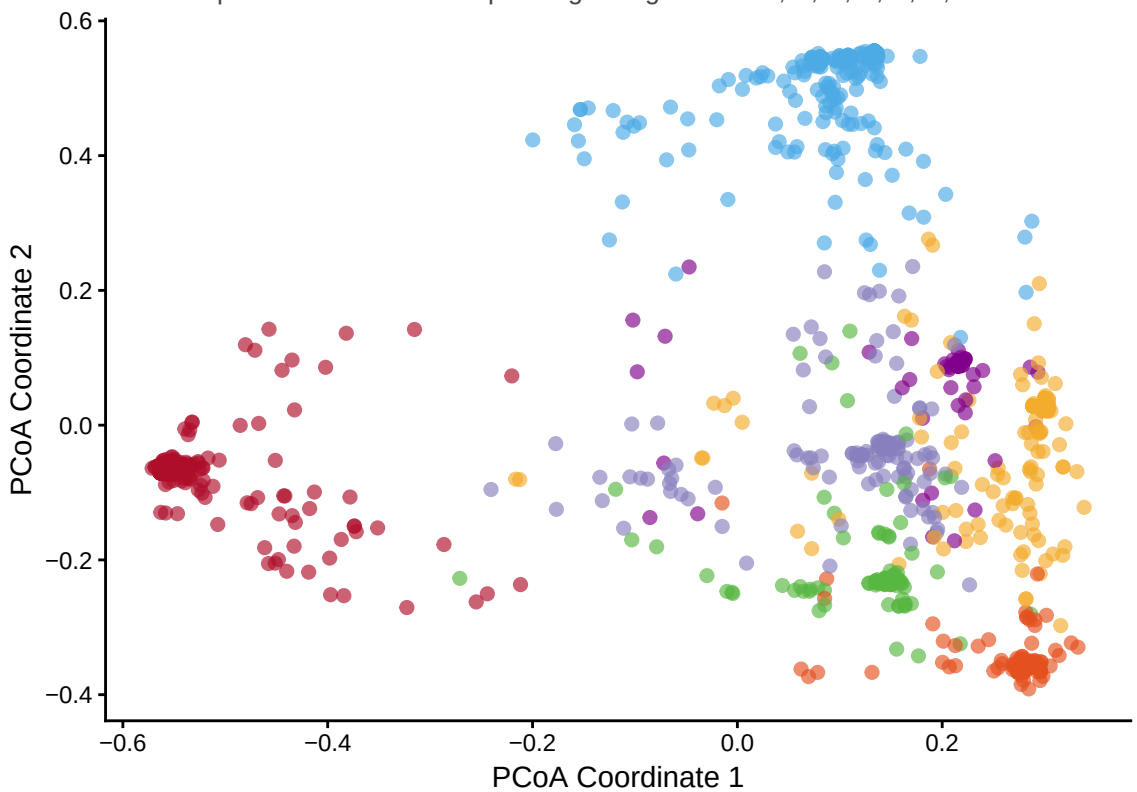

B. Silhouette Width Profile (k = 7)

1,098 core BUSCO loci grouped by Nigon unit

C. PCoA Ordination of Dice Distance Matrix

7 well−separated clusters corresponding to Nigon units A, B, C, D, E, N, X

D. Gene−Level Concordance (n = 781 Overlapping Loci)

97.4% overall diagonal agreement with legacy 2020 Nigon definitions
